Abstracts

A ‘wide format printer’ typically refers to a roll-to-roll – or roll-fed – machine, while ‘large format printer’ characterizes the market segment or in some case can refer to flatbed printers. Traditional wide format printers are categorized as being between 24” to 120”, while printers 120” or wider begin the grand format segment. Wide format printers are a production necessity for printing most construction and architectural blueprints, banners, posters, trade show graphics, murals, backlit displays, CAD drawings, wallpaper and a variety of other products. The technology today is digital, which means a computer-based interface that can often accommodate unattended print runs. With this digital technology, operation is more streamlined and allows employees to focus on other tasks.
This report elaborates the market size, market characteristics, and market growth of the Wide Format Printers industry, and breaks down according to the type, application, and consumption area of Wide Format Printers. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
