Abstracts

Cross-linked polyethylene (XLPE) is a high-quality insulation material with excellent electrical properties. Power cables account for the important component of power networks that are used in transmission and distribution. Thus, cables need huge attention as they are more prone to hazards and accidents. They are typically used in power transmission & distribution. The cables are insulated with a variety of materials such as Polyvinyl chloride, polyethylene, polyurethane, nylon, ethylene propylene diene monomer, thermoplastic elastomers, and many others, but XLPE is the best insulating material due to its ability to hold short circuit current capacity.

This report elaborates the market size, market characteristics, and market growth of the XLPE industry, and breaks down according to the type, application, and consumption area of XLPE. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for XLPE in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
