Abstracts

Second Generation (2G) technology was launched in the year 1991 in Finland. It is based on the technology known as global system for mobile communication or in short we can say GSM. This technology enabled various networks to provide services like text messages, picture messages and MMS. In this technology all text messages are digitally encrypted due to which only the intended receiver receives message. These digital signals consume less battery power, so it helps in saving the battery of mobiles.

The third generation mobile communication technology, referred to as 3G refers to the cellular network mobile phone technology that supports high-speed data transmission. 3G service can simultaneously transmit voice (call) and information (email, instant communication, etc.). The representative feature of 3G is to provide high-speed data. Service, the rate is generally above a few hundred kbps.

The 2G and 3G Switch Off market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
