Aerial photography, also known as aerial photography, aerial photography or aerial photography, refers to taking a picture of the earth's landscape from the air and obtaining a top view. This picture is an aerial picture. The aerial camera can be controlled by the photographer or automatically taken or remotely controlled. The platforms used for aerial photography include airplanes, helicopters, hot air balloons, small spaceships, rockets, kites, parachutes, and so on. In order to stabilize aerial photos, sometimes advanced photography equipment such as Spacecam is used, which uses a three-axis gyroscope stabilization function to provide high-quality stable images and is stable even under long-focus lenses.
