Additive manufacturing is often referred to as 3D printing, as it works in a similar way to a laser printer. 3D printing, however, is used in both rapid prototyping and AM. The technique builds a solid object from a series of layers, each printed directly on top of the previous. In AM, objects of any shape or geometry can be produced using digital model data from a 3D model or electronic data source such as AM file.

The Aerospace Additive Manufacturing market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
