Aerospace battery technology is used to start the engines of aircraft or start the Auxiliary Power Unit (APU). APU allows the engine to operate independently without any ground support. However aerospace battery technology helps in electrical generation failure to create emergency until the flight landing and evacuation. These batteries are also used to restart the engines after rare case of engine flameout. The batteries also acts as buffer regulator for the DC network voltage ensuring the acceptable power to the device connected to it.

The Aerospace Battery Technology market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
