Abstracts

An all-terrain vehicle (ATV) is a vehicle fitted with four low-pressure tires and handlebars. These vehicles are known for their maneuverability and off-road capabilities and are applicable in military, surveying, forestry, agriculture, sports, and others. ATVs are handled quite different and require some amount of training before they could be ridden safely. These are usually used in off-road environments but few regions permit the use of these vehicles on public roads as well. These have gained popularity over the past few years as they allow access to remote or areas and provide a convenient way of carrying supplies and equipment and might even replace the pack of animals for transport as used in a traditional way.
