Car Brake Pads are an essential component of the braking system of your car. Every time you press the brake pedal, this force translates by way of a hydraulic system to the caliper. This caliper in turn pushes the brake pad onto the car's brake rotors that are flat discs on the wheels. The pressure and friction thus created work to slow down your car or bring it to a complete halt. Brake pads are crafted out of different materials and since they absorb heat and energy during braking, they take a lot of wear. This is why they need replacing from time to time.

The Car Brake Pads market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
