Abstracts

Leasing a car is a system of possessing a brand new or used car by paying to use it for a definite time. Many vendors offer a range of vehicles that can be leased by customers for a period as and when required. Leasing is similar to renting a car; however, the former is for a relatively longer period. It involves two parties: A lessor and a lessee. Car leasing is not as same as buying a car or renting one. It is an arrangement where in a customer pays to the leasing company for the right to drive a car. The monthly payments that are made as a part of lease agreement do not add to the lessee's equity (ownership) in the car. The monthly payments just allow the customer to drive the vehicle for a specified period, which is usually 2-3 years.

The Car Leasing market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
