## **Abstracts**

CNC plasma cutting machine refers to the workpiece instruction (or program) used to control the machine tool or equipment is a new control method given in digital form. When this kind of instruction is provided to the control device of the numerical control automatic cutting machine, the cutting machine can automatically cut according to a given program. CNC cutting consists of two parts: the numerical control system and the mechanical structure. Compared with traditional manual and semi-automatic cutting, CNC cutting effectively controls and improves cutting quality and cutting efficiency through the cutting technology, cutting process and automatic control technology provided by the numerical control system or controller.
