A patrol boat (also referred to as a patrol craft, patrol ship or patrol vessel) is a relatively small naval vessel generally designed for coastal defence duties. Since the operating conditions vary widely along different coasts, a wide range of ships are required. In general, coastal patrol military vessels are smaller than the large patrol vessels and operate within sight of land. However, some coastal patrol military vessels are capable of handling very rough conditions as well. Some of the latter are 'large patrol boats' and are the exceptions generated by extremely rough coastal waters. Their speed is moderate to high. The armament is usually machine guns and small arms.

The Coastal Patrol Military Vessels market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
