Abstracts

Explosion Proof Motors are distinguished by high material quality, robust design, high index of IP protection, bearings greased for life, weather and corrosion resistant final overcoat, and high dielectric strength insulation system intended to be feed by static frequency converter. Danger of explosion is always present in mining and many other sectors of industry, such as chemical industry, refineries, on oil rigs, fuel pumps, food processing industry and waste managing companies. A risk of explosion is always present when gases, vapours, mists or dusts mix with air in explosive ratio near ingnition source, so that there is possibility of releasing of so-called minimum ignition energy. Explosion proof equipment is designed in various types of protection, in such a manner that, when properly used, it can prevent explosion if properly applied.

The Explosion Proof Motors market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
