Electric Bikes are, for all intents and purposes, bicycles. These small, compact bicycles differ from mopeds due to a key design feature – they can all be powered manually, simply by pedaling. However, each one incorporates a powerful rechargeable motor that can do the work for you when you need it to – such as on large hills, or if you're tired after a long day – and be switched off when necessary. In recent years, the convenience and great design of electric bikes has combined with another new, urban technology – folding bikes. Electric folding bikes are lightweight, powerful, and exceptionally convenient – they can take you places no traditional electric or standard-powered bike can.

The Folding e-Bike market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
