Healthcare robots are a blend of medicine and technology. These robots aid surgeons in performing surgeries with almost perfect precision. These are considered as an alternative method to minimal invasive surgeries. In the recent past, considerable development has been achieved in the global healthcare robots market as robotics is being increasingly adapted by the medicine industry to augment healthcare workers including therapists, though this can never be an alternate for humans, nor can they perform autonomously owing to patient safety concerns. However they help doctors to considerably leverage their analytical and decision-making skills, while extending their physical abilities.

The Healthcare Robotics market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
