Abstracts

Intracranial atherosclerotic disease (ICAD) is the most common cause of stroke worldwide. It is the progressive narrowing of the cerebral arteries within the skull (intracranial). Strokes may be caused either by clots or by bleeding (hemorrhage) that deprives brain cells of oxygen, leading to their death. About Intracranial atherosclerotic disease, it has been identified that it can start at a young age and progress slowly. It may not cause any symptoms until the arteries are narrow enough to reduce blood flow to the brain. Because this disease often progresses unnoticed, the first symptoms may occur during a temporary blockage of blood flow to the brain.

The ICAD (Intracranial Atherosclerotic Disease) Pathology market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
