Industrial Automation software is used to control and monitor the process (automatic) from a longer distance. An operator or Engineer does not need to go where the manual switches are to start the process. He/She just needs to start the process from the software. And another reason is, now a days we don't need to use timers and different kind of relays in the field. Everything is available in the software. So its cost-effective.

The Industrial Automation Runtime Software market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
