Made by pouring molten metal into a mould, Castings can be used to make parts of complex shapes that would be difficult or uneconomic to make by other methods (such as forging, assembling components or cutting from solid material). Castings processes may be sub-divided into processes in which the mould is destroyed as part of the process and those in which the mould may be re-used (termed die-casting).

The Industrial Castings market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
