Abstracts

Industrial temperature controllers are devices that help in maintaining the temperature for cooling or heating processes, irrespective of the environmental temperature. This device constantly checks the temperature of the medium and adjusts it to the optimal temperature. Basic temperature acts as an on/off switch. These controllers switch off if the medium reaches the set point and start again if the temperature increases or decreases. Industrial temperature controllers are classified as single loop/multiloop temperature controllers, hybrid temperature controllers, and analog temperature controllers.

The Industrial Temperature Controllers market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
