Pharmaceutical companies are adopting Internet of Things (IoT) technologies in their manufacturing plants to achieve optimization and improve efficiency of their machines and processes. Earlier techniques for synchronization of data was time-consuming and highly susceptible to human error. Different data formats used in a manufacturing plant for different processes made data access and its interpretation a barrier for effective communication. IoT technologies facilitates standardization within a facility by connecting equipment, networks, and systems to share information across the plant floor.

The IoT Spending in Pharmaceutical Manufacturing market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
