A load bank is a stationary or portable piece of equipment that provides an adjustable resistance that can simulate the actual electrical load the generator, UPS or any other electrical equipment is expected to power. This artificial load is intended to accurately mimic the electrical demands of the equipment(s), specific processes within the plant, or an entire facility. The test is performed to check the performance of the equipment to ensure that it would function efficiently, without break-downs when the actual load is used.

The Load Bank market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
