Abstracts

Online education is a type of educational instruction that is delivered via the internet to students using their home computers. During the last decade, online degrees and courses have become popular alternative for a wide range of nontraditional students, include those who want to continue working full-time or raising families. Most of the time, online degree programs and courses are offered via the host school's online learning platform, although some are delivered using alternative technologies. Although there are subtle dissimilarities, the main difference between online and traditional learning is the fact that online education liberates the student from the usual trappings of on-campus degree programs — including driving to school, planning their schedule around classes, and being physically present for each sequence of their coursework. The Online Education market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
