Abstracts

Optocouplers are capable of isolating different voltage levels thus safeguarding components from voltage spikes in the same circuit. These components are highly used in automobiles, industrial applications, communication sector and printer & imaging devices among others. The primary purpose of the optocouplers is to isolate or step down from high voltage current to low voltage current. New technologies for isolation are giving rise to high speed, high operating temperature and low input current optocouplers.

The Optocouplers market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
