Abstracts

proteins are made up of amino acids, and they are the “building blocks” of life. Our skin, muscles, tendons, cartilage, even hair and nails, are all thanks to protein. Protein helps form enzymes, hormones, antibodies and new tissues. It replaces old cells with shiny new ones, and it transports important nutrients in and out of those cells. The human body can manufacture all but nine of the 22 amino acids that make up proteins.

There are plenty of other sources of protein besides meat, and they're incredibly good for your body. Plant protein is a kind of protein, which is derived from plants. The nutrition is similar to animal protein, but it is easier to digest.

The Plant-Based Protein market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
