## **Abstracts**

Precast Concrete Construction is produced by casting concrete for construction of buildings, infrastructures and more. They are produced in reusable molds either in the plant or at the construction sites. This production process is performed on ground level, which gives safety throughout a project. Precast concrete from reusable molds allow cost to be lower than for site-cast production. Precast concrete are strong enough to tolerate extreme weather conditions and will perform the same for many decades of constant usage.
