Abstracts

Product reviews software, or customer feedback software, allows e-commerce businesses to host reviews of products on their websites for the purpose of improving the e-commerce business experience. The software helps the merchant measure and improve customer satisfaction, identify unhappy customers, and get valuable insight from the buyers themselves. Product reviews software helps e-commerce websites engage with their consumers, understand customer behavior, and improve their product or service based on authentic feedback. Unlike Online Reputation Management software, of which there is confusion but no crossover with Product Reviews software, the latter software provides little monitoring or managing of reviews. Product reviews software integrates with e-commerce platforms and works alongside email marketing software and social networks.

The Product Reviews Software market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
