A security systems integrator by definition specializes in bringing together subsystems into a whole and ensuring that those subsystems function together. When the goal is physical security, those subsystems might be video surveillance, access control, intrusion, emergency notification, computer networks, and more. Some security suppliers have established business simply on the procurement and installation of systems predefined by others. More fully developed are considered 'design-build' integrators. However the most capable security integrator is a full service provider capable of supporting your operations in every phase of the security system lifecycle.
