Abstracts

Solar canopies are elevated structures that host solar panels and provide shade. These overhead solar panel installations are typically installed in parking lots or other paved areas.

In practice, solar canopies are similar to solar carports and ground mounted solar panels – each provides an alternative to rooftop solar, whether because a roof can't host solar panels or because a property's electricity needs are too large for a rooftop solar system. Many solar parking lots also incorporate electric car charging stations so that drivers of electric vehicles can recharge with solar power while parked.

The Solar Canopy Carport market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
