Abstracts

A Solar Microinverter and Power Optimizer are plug-and-play devices used in photovoltaics, that convert direct current (DC) generated by a single solar module to alternating current (AC).

Solar Microinverters and Power Optimizers carry out the same task within a solar panel system as they convert direct current (DC) energy into the alternate current (AC) energy that can be used in home. Both of them can monitor the performance of individual solar panels, rather than the solar panel system as a whole. Microinverters and power optimizers improve performance for solar panels on complicated roofs, or roofs that experience marginal shading during the day.

The Solar Microinverter and Power Optimizer market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
