Abstracts

Steel grating is a regularly spaced collection of essentially identical, parallel, and elongated elements. It is strong, robust, durable, and reliable with high tensile strength as compared to aluminum and fiber grating. The utilization of steel grating depends on the load that it needs to bear. It is widely adopted in several applications, as it is resistant to corrosion and requires low maintenance. It is used in several applications such as factories and buildings where ease of movement and safety is required. In industrial applications, steel grating is used for manhole covers, stair treads, and handrails.

The Steel Grating market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
