Sustainable packaging is also known as green packaging. It is a type of packaging which is light in weight and tough in physical properties. This type of packaging is widely used by various sectors such as healthcare sector. Sustainable packaging has no harmful effect on environment as compared to other packaging. Sustainable packaging helps to minimize the carbon footprints. Sustainable Packaging not only plays an important role in maintaining the shelf life of the product but also reduces adverse effect on environment, which is prominent with the use of non-bio degradable plastic materials for packaging.
