Abstracts

Thermal transfer overprinters are used to print on many types of flexible packaging materials and some rigid substrates as well. Thermal transfer technology allows for continuous or intermittent printing of date codes, batch codes, bar codes, text and other graphics. This printing technology is ideal when the print quality of thermal transfer printing is required in-line for printing of variable information and real-time data. With this technology, a thermal printhead transfers heat through thermal transfer ribbon to mark the substrate clearly and quickly.

The Thermal Transfer Overprinters market revenue was xx.xx Million USD in 2019, and will reach xx.xx Million USD in 2025, with a CAGR of x.x% during 2020-2025.
