Abstracts

Truck bedliner or simply Bedliner are products that shield the inner-side of a truck bed from damage and also can create a skid-resistant surface allowing cargo to stay in place, depending on circumstances. There are two broad classifications of bedliners: 'Drop-in' and 'Spray-on/in'. 'Drop-in ' bedliners are easily applied to the truck bed with no preparation work required, and can be easily removed as well for cleaning. Spray-in bedliners require specific preparation to allow the coating to adhere correctly to the bed; the better the coating adheres will determine how long it will last.
