## **Abstracts**

TV refers to the use of electronic technology and equipment to transmit active image pictures and audio signals, that is, television receivers, and is also an important broadcast and video communication tool. Video refers to a variety of techniques that capture, record, process, store, transmit, and reproduce a series of still images as electrical signals. When continuous image changes exceed 24 frames per second, according to the principle of visual persistence, the human eye cannot distinguish a single static image; it appears to be a smooth continuous visual effect, such that the continuous picture is called video.
