Abstracts

Undetected water leaks are very common in residential & non-residential places. Water leakages as small as a pinhole leak, continuously leaking for months or years can wreak havoc on properties. There are plenty of reasons that lead to pipe leaks in older or newly constructed buildings such as every day wear & tear, debris such as hair & grease can cause damage, water pressure, chemical in the water, soil conditions, and fixtures break down. Moreover, water leakage in buildings will lead to increase in water bill, discoloration or mold on walls, cracks in the tile, wall, or concrete foundation. This is the reason why installation of water pipeline leak detection equipment or routine inspection is necessary. The earliest detection of the leakage may safeguard further damages.
