Abstracts

Abrasive blasting equipment makes surface preparation much easier than grinding or manual preparation. The use of blast equipment is more convenient as it is portable and easy to carry and work within limited spaces. The most commonly available blasting equipment is sand blasters that utilize silica sand. Other blast media include coal slags, garnet, nickel and copper slags, glass beads, steel grit, dry ice, plastic beads, corn or wheat starch, crushed nut shells, and sodium bicarbonate. Most of these materials are blasted using both dry and wet media.
