## Abstracts

Acne is a long-term skin disease that appears because of clogged hair follicles, dead skin cells, and oil excreted from skin. It is characterized by the presence of considerable number of pimples, whiteheads, blackheads, oily skin, and probable scarring. It generally affects the skin with comparatively high number of sweat glands at upper part of chest, back, and face. Acne medications are drugs that are indicated for the treatment of acne. These include several prescription and over-the-counter medicines such as retinoids, isotretinoin, antibiotics, salicylic acid, benzoyl peroxide, oral contraceptives, and others.

Based on the Acne Medication market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.
