## Abstracts

Active Data Warehousing can also termed as Real-time Data Warehousing and is a business-critical system for an organization, which is intended not only to support higher management with strategic decision making but also to reach executives at the ground level to support operational decision making. Active Data Warehouse is a repository that captures transactional data in any form so that they could be used to derive the desired trends and be used for future decision making.

Based on the Active Data Warehousing market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
