Abstracts

Activewear is a utility apparel, which enhances the performance of athletes during sports or fitness physical activities by improving the body movement as compared to regular clothes. Moreover, most of the activeweares are useful to prevent muscle sprains and other ligament & muscle-related injuries, owing to the adequate fitting and proper support provided by these apparels. In addition, activewear has advantages such as breathability, quick drying, static resistance, thermal resistance and chemical resistance.

Based on the Activewear market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
