## Abstracts

Every organization needs a reliable security system as a way to confirm the truth of something or the identity of a person. The basic or traditional password method is too often breached or copied/shared, thereby exposing data to theft or malicious intrusions. The other factor contributing to the growth of the advanced authentication solutions market is the increased adoption of mobility.

Vendors of advanced authentication solutions are developing and improving their existing authentication methods. Some of the most commonly used authentication methods are biometrics, smartcards, tokens, and several others for mitigating security risks.
