Abstracts

A fire-fighting vehicle is a vehicle designed for firefighting and other rescue operations. An aerial ladder is an apparatus used in gaining access to fires that occur at a greater height, where conventional ladders equipped with conventional appliances may not reach. Aerial ladder fire-fighting vehicles are deployed during catastrophes and emergency situations where aerial rescue operations are conducted. Aerial ladders are manufactured of high resistant steel. These vehicles can also be equipped with a water & foam tank and a fire pump as per the requirements.
