An aerobridge is a surrounded moveable or fixed connector which is extended from an airport terminal gate to an aircraft for passenger boarding and disembark from an aircraft. An aerobridge is also known as jetway, airbridge, gangway or skybridge. The aerobridge are attached at one point of the terminal by a pivot and can be moved left or right, raised or lowered, retracted or extended according to the aircraft position and size of the aircraft. The leveling of these aerobridges are controlled by an operator stationed in the cab, which is like a canopy that allows weather proof seal.
