Abstracts

Agricultural insurance protects against loss of or damage to crops or livestock. It has great potential to provide value to low-income farmers and their communities, both by protecting farmers when shocks occur and by encouraging greater investment in crops.

Agricultural reinsurance means that the insurance company transfers the risk of the insured agricultural insurance business to other insurance companies in the form of reinsurance by entering into a reinsurance contract to achieve risk dispersion in a larger scope.

Agriculture is a growth area. As a growing global population and changing diets fuel demand for higher crop output, Agriculture reinsurance protect the capital needed to increase production.
