Abstracts

Aircraft refueling trucks are also ordinary refueling vehicles. However, many aircraft use aviation kerosene, which is different from ordinary diesel gasoline. Aviation kerosene is corrosive to common metals, so all tanks, pipelines, pumps, tankers, etc., where all kerosene flows are required to be protected with stainless steel. The cost will be several times that of a regular fuel truck.

Based on the Aircraft Refueling Trucks market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.
