Abstracts

Airport surveillance radar is installed in airports to guide air traffic controllers in managing aircraft movements on the runway. An airport surveillance radar system is a system which is used at airports to identify and exhibit the position of an airplane in aerospace around airports. It is used to monitor air traffic around the airport. This system controls traffic inside a radius of 30 to 50 nautical miles (56 to 93 km) of the air terminal and can detect and track aircraft at altitudes less than 25,000 feet.
