## Abstracts

Ancient grains are a combination of cereals and pseudo-cereals. These grains and pseudo-grains have hardly changed through selective breeding over the past few thousand years, while grains such as grains, corn, rice and modern wheat are products of thousands of years. Selective breeding. Although some nutritionists have disputed the health benefits of ancient grains, the grains on the market are usually more nutritious than modern grains.

Based on the Ancient Grains market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
