## Abstracts

What Antistatic Floor provides is a type of protection against electrostatic discharge. The way that it works is that the floor has been grounded to lead electrostatic discharge literally into the ground, hence the word usage of “ground.” There are many instances where anti static flooring is actually a necessity. For example hospitals need to have anti static flooring as do many industries that deal with computers. Computers can be harmed by an electrostatic discharge, as can many of the electronic devices used in an array of computerized equipment thus that is why hospitals need anti static flooring. Actually any business that utilizes static sensitive operational equipment will be in need of various forms of anti static flooring.
