## Abstracts

Beyond the large monitors used for in-console navigation, controls and rear-seat DVD systems, the most exciting advances are in head-up display (HUD) systems, a classification extending to any transparent display that presents data without requiring the user to look away from the usual field of view. HUD systems superimpose vehicle information such as speed, warning signals and indicator arrows on the windshield, allowing drivers to maintain their focus on the road while receiving information that would normally require a glance at an instrument panel on the dashboard.

Based on the AR HUD market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
