## Abstracts

An arcade game is a game machine typically found in public places like malls, restaurants and amusement arcades, and is usually coin operated. Arcade games are usually video games, pinball machines or electromechanical games. The late 1970s through the 1980s was the golden age of the arcade games. They enjoyed some relative popularity even during the early 1990s. The popularity of this platform slowly declined, however, as console and PC games came into prominence.

Based on the Arcade Gaming market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
