Abstracts

Augmented reality is an interactive experience of a real-world environment where the objects that reside in the real-world are 'augmented' by computer-generated perceptual information, sometimes across multiple sensory modalities, including visual, auditory, haptic, somatosensory, and olfactory.

Mixed reality (MR, though that isn't an often used acronym) is a form of augmented reality that is somewhere between VR and AR. Mixed reality augments the real world with virtual objects that aim to look as if they are really placed within that world.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Augmented Reality and Mixed Reality market covering all its essential aspects.

For the competitive landscape, the report also introduces players in the industry from the perspective of the market share, concentration ratio, etc., and describes the leading companies in detail, with which the readers can get a better idea of their competitors and acquire an in-depth understanding of the competitive situation.
