## Abstracts

Washing machine is the machine used to wash the various types of clothes without applying any physical efforts. With washing machine you don't have to rub the clothes with hand or squeeze them to remove the water from them. The automatic washing machine only needs to preset a certain program on the control panel. When washing, select one of the programs, just open the faucet and start the washing machine switch. The washing machine automatically recognizes the control water level and accurately performs the functions of soaking-rinsing-dehydration-automatic drainage, and automatically stops when the laundry is completed with buzzer sounds.
